SERIES

CF2024H Dust Extractor Filter

Specification	CF2024
HEPA Grade	H13
Filtration Size	99.95% > 0.3 micron
Cartridge Internal Dia	500mm (20")
Cartridge Height	625mm (24")
Weight	9kg
Rating	Trade

Installation

The filter is supplied fully assembled.

Remove the existing cloth filter bag and support arm, or the existing cartridge filter, from your dust extractor.

Check the condition of the upper rim of the extractor drum where the seal will be made. Clean it if necessary.

Place the filter onto your dust extractor.

Position the metal strap clamp around the bottom of the filter and engage the clamp.

Cleaning Routine

To clean the filter, daily (or after each use if used less frequently) make one complete rotation of the handle in both clockwise and anti-clockwise directions.

This will dislodge trapped dust particles which will fall into the collection bag.

HEPA Filter Product Performance Report

Manufacturer: Jianxi National Bridge Industrial Co. LTD
Product Type: PET Non-woven
Date: 08/10/2024

序号	检验项目(Items)		测量值 Results
1	克重(Unit weight)g/m ²		240
2	厚度(Thickness)mm		0.62
3	断裂强力	纵向(MD)N/5cm	500
	Tensile strength	横向(CD)N/5cm	460
4	伸长率	纵向(MD)%	10
	Elongation	横向(CD)%	15
5	透气率	L/M ² s	50
	Air permeability		
6	效率	0.3(Size)μm/%	99.95
	Fractional Efficiency
